SPEEDMASTER MOONWATCH

In July 1969, the Speedmaster earned its nickname when it became the first watch worn on the moon, and in 1970, it went above all expectations when it helped guide the crew of the crippled Apollo 13 mission back to safety. Updated today as a Co-Axial Master Chronometer, the iconic Moonwatch is now tested and certified at the highest level by the Swiss Federal Institute of Metrology (METAS) - which guarantees more accuracy, reliability and supreme resistance to magnetism.
